

PHC-150

- Body, inside bucket and lid are made from HDPE injection molding material to achieve a high chemical resistance; lavatory connection made from PP material.
- Easy to install
- Multiple configurations available for installation
- Easy to clean

Easy cleaning by removing top access gasketed lid and accessing the internal sediment bucket. Simply latch design permits fast and easy removal of the lid.

PHC-150 in Acid Neutralization configuration.

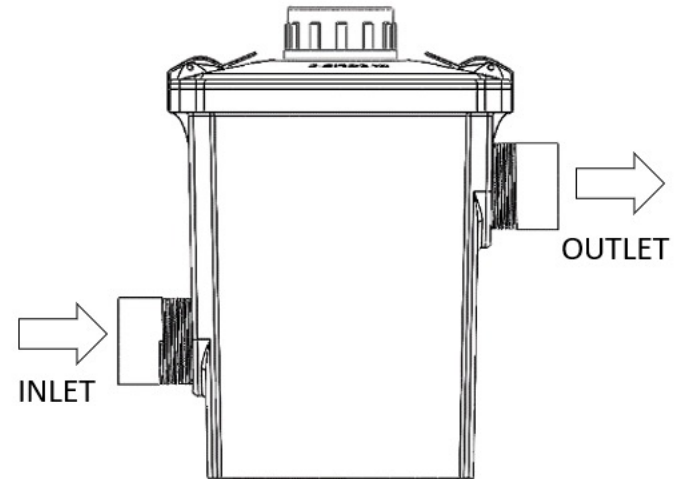

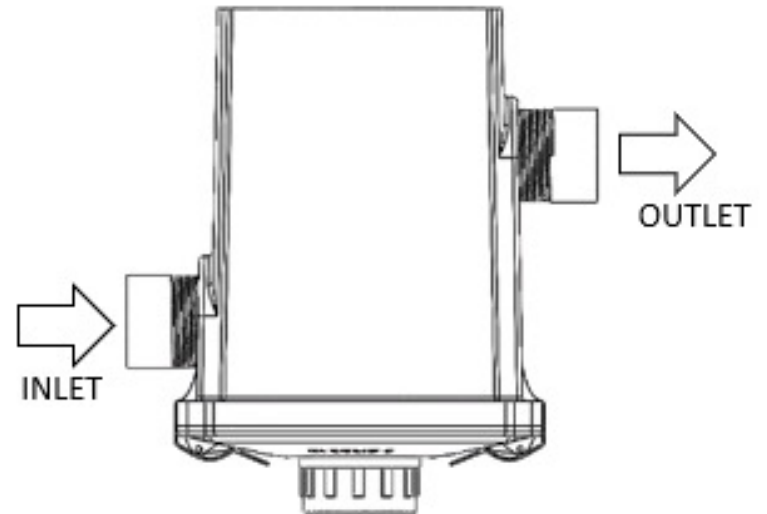

- Replaces standard P-Trap
- There is no need for acid resistant down stream pipe
- Body is made from HDPE material
- Comes with body, inside media bucket, syphon, PP pipe 1-1/2" standard lavatory connection, two bafflers (for media filter) and one cap
- The unit has 1.5 gallons liquid capacity.
- The maximum flow rate is 8GPM
- The unit uses solid alkali non-resin material to neutralize acids in a self-contained system
- Each unit comes with a full charge of media

PHC-150 in Solid Interceptor configuration.

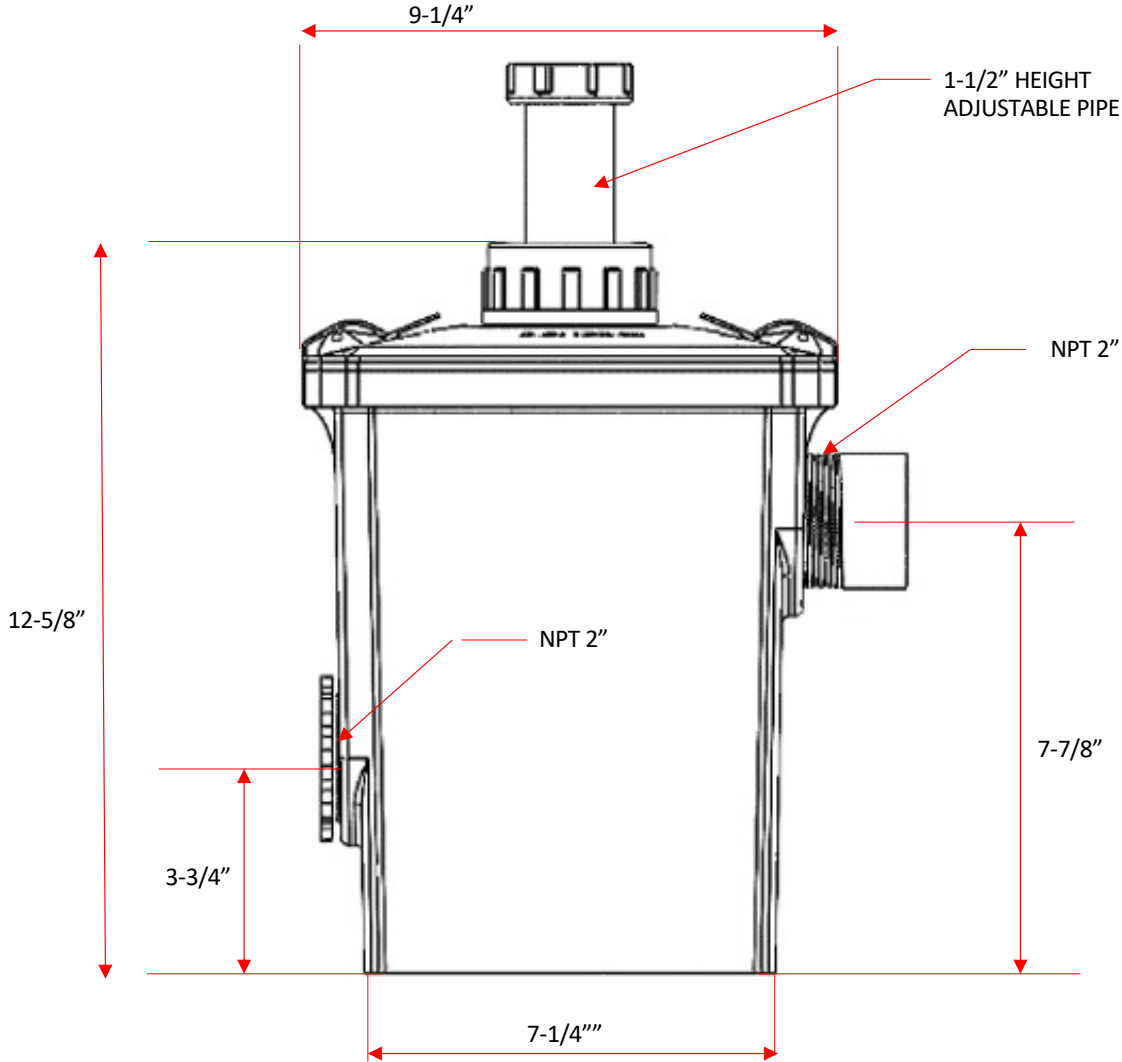

When used as solid interceptor, PHC-100 will filter out solids and sediments from the fixture waste line before entering the related grease interceptor to reduce clogging and increase performance.

Multiple options to install PHC-150 as solid interceptor, to fit various field requirements.
